So what can we do?

- Respect the autonomy, security, privacy & dignity of individuals & communities
- Scientific integrity: quality, integrity & contribution to knowledge
- Act with social responsibility
- Maximize benefits & minimize harm

University of East Anglia

Openness & appropriateness

Why am *I* doing this?

Is this work harmful?

Who profits?

What are the social contexts of this work?

What are the wider political contexts of this work?

What are the environmental impacts?

Privacy & security
